

Amendments to the Specification

Please amend the paragraph bridging pages 8 and 9, as follows:

In the polymerisable host, $Q \text{---} \left(\text{---} L \text{---} \right)_m \text{---} X \text{---} I_n$, the charge-transporting fragment, Q, preferably contains at least one carbazole unit. More preferably, Q contains at least two carbazole units. Known hole-transporting arylamine materials such as those with

where Ar is an optionally substituted aromatic group, such as phenyl, or

and Ar₁, Ar₂, Ar₃ and Ar₄ are optionally substituted aromatic or heteroaromatic groups. Ar is preferably biphenyl. At least two of Ar₁, Ar₂, Ar₃ and Ar₄ are bonded to a cross-linkable group, X. Ar₁ and Ar₂, and/or Ar₃ and Ar₄ are optionally linked to form a N containing ring, for example so that the N forms part of a carbazole unit eg.

Please amend the title of the second paragraph at page 17, line 11, as follows:

~~Synthesis of Bis[3,6(3-formylphenyl)-carbazol-9-yl]biphenyl~~

Synthesis of Bis[3,6(3-formylphenyl)-carbazol-9-yl]biphenyl

Please amend the title of the second paragraph at page 18, line 5, as follows:

~~Synthesis of Bis[3,6(3-vinylphenyl)-carbazol-9-yl]biphenyl) (CBP-st₄).~~

Synthesis of Bis[3,6(3-vinylphenyl)-carbazol-9-yl]biphenyl) (CBP-st₄)
